

Instructions to the Authors

Brazilian Journal of Poultry Science is published with the coordination of the Publishing Committee of the APINCO Foundation of Poultry Science and Technology; and the concepts are of the authors' full responsibility.

Brazilian Journal of Poultry Science published three times each year will consider original material for publication relevant to entire field of poultry science and all other birds. Subject areas include Immunology, Biochemistry and Cellular Biology, Housing and Environment, Wasting Control, Avian Diseases, Nutrition, Improvement, Physiology and Breeding, Management, Egg Production, Meat Technology, Wild and Exotic Birds, Quail Production.

TYPE OF PAPERS

The Journal publishes original research papers in full and short communication formats, case reports, technical reviews, reviews, guest editorial and technical reviews. Short communications are for reports that are complete, but can be adequately presented within the length restrictions below. Case report should describe in detail a new or unusual naturally occurring disease. Authors wishing to offer a review, guest editorial or technical review should contact the Editor.

The Journal has the objective of publishing complete scientific and technical articles and reviews in the area of Poultry Science, elaborated by specialists, as long as they follow the journal policy.

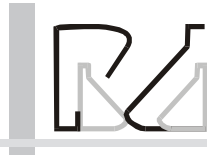

The publication of articles will depend on the observance of the Editorial Norms and the evaluation of the Publishing Committee and the Editorial Board and/or *ad hoc* referees. All evaluations are of confidential and impartial character; both authors and members of the Editorial Board and/or *ad hoc* referees shall not obtain cross information among themselves.

Manuscripts should be submitted in English language only.

Submission of a manuscript to BRAZILIAN JOURNAL OF POULTRY SCIENCE implies that (1) it has not previously been published, (2) that it is not being submitted for publication elsewhere, (3) that all authors have approved the manuscript, (4) that all authors have obtained permission from their employer or institution to publish, if they have a contractual or moral obligation to do so and (5) that relevant permissions, including ethical approval, has been obtained for working involving the use of animals and genetic manipulation. Papers describing experiments which demonstrate a lack of concern for current ethical and welfare standards will not be accepted for publication. The final decision in this respect belong to the Editor.

The manuscripts and other correspondence should be send to:

PREPARATION OF MANUSCRIPTS

Full length papers

Should present the results of a research which contributes in a relevant way to the development of poultry science. If part of the results were published previously as a summary in congress, seminar or symposium it must be stated. Priority will be given to articles, which present new concepts, methodologies or innovative experimental approaches. There is no limit to the number of pages of the manuscript, however, the authors should maintain a minimum number, including figures and tables.

They should contain the following sections, each written concisely: Title, Abstract, Introduction, Material and Methods, Results, Discussion and References. Acknowledgements should be included after Discussion.

The sections Results and Discussion can be placed together if appropriated.

The abstract should contain up to 250 (two hundred and fifty) words, followed by the key words in alphabetic order, limited to 5 (five), which correspond to words or expressions that identify the contents of the article.

Short communication and Case report. Should have the same layout as full length papers, including the headings Introduction, Abstract, Material and Methods, Result, Discussion, Acknowledgments and References. They should comprise up to 1000 words (plus abstract, references and legends) and should contain no more than three/illustrations.

Technical Article

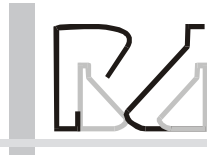

Technical articles should present the development of new methodologies and/or techniques that can be applied to improve the poultry production. These should follow the editorial norms including all sections of the scientific article.

Guest editorial, Technical review and Reviews

Will be published by specialists invited by the Publishing Committee. These articles can also be submitted by independent author(s), and in this case the draft of a review article will be submitted to the Publishing Committee, and if considered adequate, the author(s) will be invited to prepare the review for publication. The review should follow the norms of the scientific article, however, without subdivisions in Introduction, Material and Methods, Results and Discussion, preserving the abstracts with key words, similar to those on the scientific article, besides References.

PRESENTATION OF THE ARTICLES

- 1. Typing:** original in 3½" high density diskette, properly identified by the title of the article and the name(s) of the author(s) and three printed copies, with tables/figures and references. It should be obligatorily typed in the A4 format (21,0 x 29,7cm), double space, on one side of the paper, left side margin of 3,0 cm, Times New Roman font size 16 for the title, 14 for the items in the body of the text and size 12 for the text, consecutive numbering of pages and numbering of the lines of the text. Illustrations and legends should be listed on separate sheets. The manuscript should be presented using one of the following text editors: Microsoft Word for Windows or Microsoft Word version 6.0 or superior. Use only official nomenclature and well known abbreviations, not using abbreviations in the title.
- 2. Cover Page:** all articles should have a cover page with the title of the article, complete name(s) of the author(s) and Institute of origin. The footnote of the page should mention the complete address (e-mail is essential) of the author to whom correspondence should be forwarded.
- 3. Tables:** these should be numbered in Arabic numerals and headed by the title. The elaboration of tables should follow the Tabular Presentation Norms established by the National Council of Statistics (Rev. Bras. Est., v.24, p.42-60, 1963), when possible. Tables sent in other program than Word, must be send in the original computer program together with a printed copy.
- 4. Illustrations (photographs, graphs, drawings):** Should be numbered consecutively with Arabic numerals and stated as figures. All figures should be identified on separate sheets with the title of the article, name(s) of the author(s) and indication of the part of the text where they should appear. The legends should also be presented on separate sheets. In the case of photomicrography's in black and white these should carry the enlargement bar with the amplitude determined in the legend of the Figure(s). Photographs, figures and scanned material must be send separately in high resolution computer software (minimum 600 dpi, tif format or jpg for PC). If it is necessary to compact the file, use the WINZIP software. The figures will be published in black and white; if the author wishes to have colored photos and or figures, the author will pay for such expense (consult the executive editor previously).
- 5. Units:** The International Metric System should be used for units and abbreviations. Examples: s for seconds, min for minutes, L for liter, cal for calories, J for joules, kDa for kiloDaltons, 5 mM, instead of 5×10^{-3} or 0,005 M.

6. References: these should be arranged in alphabetic order by the author's surname. The complete title, never abbreviated, of the periodical should be mentioned. All authors of the article must be cited. In this section it is not allowed to use italic words, irrespective of their Latin origin.

Examples:

Bakst MR, Gupta K, Akuffo V. Comparative development of the turkey and chicken embryo from cleavage through hypoblast formation. *Poultry Science* 1997; 76(1):83-90.

Bouzoubaa K, Nagaraja KV. Epidemiological studies on the incidence of salmonellosis in chicken breeder/hatchery operations in Marocco. In: Snoeyenbos GH, editor. *Proceedings of the International Symposium on Salmonella*; 1984; Kennen Square, PA: American Association Avian Pathologists; 1985. p.337.

Briceno WNO, Guimarães FCR, Cruz FGG. Efeitos da densidade populacional de frangos de corte em época quente no município de Manaus. In: 10º Congresso Brasileiro de Avicultura; 1987; Natal, Rio Grande do Norte. Brasil. p. 131-2.

Gabriel JE. Efeitos do nível energético da ração e do estresse térmico na expressão da proteína de choque térmico Hsp70 e nos níveis do seu mRNA no fígado de frangos de corte em diferentes estágios de desenvolvimento. [Dissertação]. Jaboticabal (SP): Universidade Estadual Paulista; 1996.

Ginsburg M. Primordial germ cell development in avians. *Poultry Science* 1997; 76(1):91-5.

Simon VA, Oliveira C. Vacinação em avicultura através da água de bebida. In: Macari M, editor. *Água na avicultura industrial*. Jaboticabal: Funep-Unesp; 1996. p. 73-85.

Summers JD, Leeson S. *Commercial poultry nutrition*. 2 ed. New York (NY): State Manual Book & Periodical Services; 1997.

7. Quotations in the text: state the surname of the author followed by the year in parenthesis, corresponding to what appears in the References. When it is the case of two authors, both should be stated. In the case of more than two authors, the quotation should be followed by the surname of the first author followed by the expression et al. (in italic), according to the following examples:

Examples: Simon (1996)

Silva & Silva (1988)

Briceno et al. (1987)

8. Scientific names of microorganisms: must follow Berg recommendatoin.

9. Fees: The author(s) will be charged US\$ 15,00 (fifteen dollars)/ R\$25,00 (twenty five reals) per edited page with the payment being done on the devolution of article proof; however, if the first author subscribe the Journal the price will be US\$ 10,00 (ten dollars)/ R\$15,00 (fiften reals) per page.

Alterations in the text can be done, however, the author(s) will be charged. A reduction of fee/page can be required if among authors there are collaborators who do not work specifically in the area. Reprints of the published papers should be provided to the author(s) if required, and the price will be presented according the number of reprints (contact the Editor must be done on request).

10. Proofs: Usual practice will be to send proofs to the corresponding author, who should be identified on the title page of the manuscript. Proofs should be return within three days, preferable by fax (or e-mail) in the first instance and then by post (air mail where appropriate). It is a condition of acceptance that the Editor reserves the right to proceed to press without submitting the proofs to the author. While reasonable steps will be taken to ensure that proof reading is accurate, neither the Editor nor the Publisher shall be responsible for any errors.

11. Offsprings: There is no free offsprings. They can be provided after Editor consultation.

12. Copyright: It is a condition of publication that the authors vest copyright in their articles, including abstracts, in the FACTA - Fundação APINCO de Ciência e Tecnologia Avícolas. This enable us to ensure full copyright protection and to disseminate the articles and the journal to the widest possible readership in print and electronic formats as appropriate. Authors, of course, may use the articles elsewhere after the publication without prior permission from FACTA, provided that acknowledgement is given to the journal as the original source of publication. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.
